SEPTEMBERFEST

Thursday 20th AND Friday 21st October

After 2 years off, we're returning with the 11th rendition of our infamous SeptemberFest party on Thursday 20th AND Friday 21st October.

As with previous years we need your help with a brand new logo to proudly display on our commemorative glasses. The winner will get a free ticket to the event!

The logo needs to be round and include 'SeptemberFest', '2022', 'pHbar' and the number 11. Examples from previous years winners can be seen below for inspiration!

Please send all your submissions to phbar@icr.ac.uk by Friday 23rd September.

More information will follow after the winner has been chosen!

The Quiz Returns

The pH bar quiz is back! Come down to the bar on Thursday 29th September at 6:30 pm in teams of up to six for a chance to win the rollover jackpot! Entry is £1 per person.

PhD students Iona and Gitu will be hosting!

Come early to guarantee a table!

Volunteer of the Month

Our volunteer of the month is our very own committee member Nick Cundy:

Hi, I'm Nick! I'm a Post Doc in Med Chem 4 and I work on inhibitors of a pesky cysteine deubiquitinase. I'm also a member of the pH bar committee! Having the opportunity to help organise and run events out of our bar has been a real pleasure and I look forward to serving you all over the next year. Want to get involved and help steer the future of the pH bar? Get in touch with the committee at phbar@icr.ac.uk.

Drink(s) of the Month

Our two new fruity ciders made their debuts at the August Beer Bonanza but they went down so well we've decided to keep them! These delicious, fruity ciders are served still over ice. Perfectly thirst quenching, the ciders are available as a half pint (£2.50) or a pint (£4).

Let us know if there is a particular flavour you'd like us to stock!

Puzzle

Solve the puzzle below and send the solution to phbar@icr.ac.uk to be in for a chance to win a drinks card worth £5 to spend at the bar!

$$\text{Banana} + \text{Banana} = 8$$

Last month's winner was Jack O'Hanlon!

$$\text{Pizza} + \text{Banana} = 9$$

Solve the final equation!

$$\text{Wine} - (2 \times \text{Pizza}) = 10$$

$$\text{Wine} + \text{Pizza} + \text{Banana} = ???$$

Hosting your own events @ the pH Bar

The pH bar is an ideal space to host social events. The bar can be booked for any day/evening in the week that we aren't open for private social/team events for free. If you want to buy alcohol/snacks you will need two trained bar staff (takes one shift). In the past the bar has been booked privately to watch sports, mini-conferences and even playing dungeons and dragons!

Get in touch with us phbar@icr.ac.uk if you'd like to use the bar for your event.
